CRITIQUES

- 1 UAS low, 5 to 30 foot, training. Practice flying close to the ground. It was a good practice and learned some things about flying low.
- 2 The 3 National Nights Outs. Held at Longview, Kelso, and Castle Rock. They all went well and everyone seemed to have a good time.
- 3 Cowlitz County Admin Evacuation Exercise. Was Canceled.
- 4 FLIR'S UAS Demo at County Sheriff's Office. They have a new drone, Sky Ranger R60 (\$60K), that has many nice features. Went down to talk about training and flying rules.
- 5 UAS Quarterly Meetings. Only had 4 people attend. It was hard to get much done. Did view some pictures, talked about low level training, need to do a night practice, Geo-fencing. What are some good times to meet and where are good locations? There is a good online school that is for line training. Ralph told us about it, UAVgroundschool.com, it cost \$150. There is also King Schools. Randy made up a form for a Clients Request so we have a good description of what we are to do.
- 6 Time to Setup the ACS Red Canoe account. We are working on what type the account should be and what card to use.
